NEOLITH... THE NATURAL CHOICE

Transforming imagination into functionality, Neolith is the premium fashion stone. Imported directly from Europe, Neolith synergises the utmost design principles with functionality, resulting in a scratch, stain and heat-resistant surface. Made to the highest international standards, Neolith is available in a wide range of styles and textures and is suitable for the most demanding applications.

Neolith is synonymous with excellence and obsession for details. Its striking designs and superior technical characteristics make it an ideal material for kitchens, bathrooms, furnishings, display fittings, shop fittings, cupboards, work surfaces, wall and floor cladding.

Redefining architecture around the globe, Neolith has featured in numerous award-winning and innovative designs. After years of research and innovation, Neolith is 100% eco-friendly. Consisting of all raw materials pressed under immense pressure, Neolith promises a lifetime of excellent service.

NEOLITH APPLICATIONS: A NEW WAY OF LOOKING AT SHAPES AND SPACES

RESIDENTIAL & COMMERCIAL PROJECTS

The perfect solution for all residential and commercial surfaces with exceptional durability and aesthetic appeal. Neolith sintered stone slabs are available in three thicknesses, suitable for both work and leisure surfaces, cladding applications including furnishings, shop fittings, display fittings, cupboards, doors, walls and floors.

FURNISHINGS AND FITTINGS

Can be used for furniture, shop fitting and display cladding providing multiple colour options and combinations. The exciting possibility of an entirely holistic look where the furnishings, fittings, work surfaces, floors and walls are all of the same material and even the same colour.

FLOORS AND WALLS

Perfect for wall and floor cladding because of its large slab size. Easily cut into any panel size, the 6mm gauge makes it light-weight, easy to handle and doesn't require additional reinforcement of the sub-surface to carry the extra weight of the cladding. The large panel size makes it an extremely hard-wearing material, ideal for high traffic commercial areas and residential homes.

You are one step closer to choosing your Neolith masterpiece.

NEOLITH SINTERED STONE COMPACT SURFACE FORMAT SIZE & THICKNESS

3mm thick x 3600 x 1200mm

Ideal for use as indoor furnishings in bathrooms, kitchens, and on furniture such as tables, wardrobes/closets, doors and office partitions. This thickness is ideal for refurbishment projects. Being so thin, it can be placed directly on the existing surface without the need to extract, helping to reduce project execution times, costs and waste in landfills.

6mm thick x 3200 x 1500mm

Ideal for use in flooring/walls (both indoors and outdoors), stairs, covered pools and exterior facades.

12mm thick x 3200 x 1500mm

Neolith is now able to offer a larger, thicker slab for kitchen and bathroom countertops. The new size allows for better utilisation of the surface, as well as reduced waste. For instance, one large slab can be utilised for two full countertops.

The growing commitment to research and development, and constant impetus for its product innovation have consolidated Neolith as the pioneer architectural surface in the market that provides solutions to the most demanding professionals within this sector.

NEOLITH SINTERED STONE AVAILABLE IN 4 DIFFERENT FINISHES

SATIN

Neolith's original finish is characterised by its natural matte look and a slightly textured feel which confers the high resistance properties of the material.

Phedra Satin

SILK

While maintaining the look of the satin finish, the Silk finish is much softer to the touch. The smooth nature of the surface is achieved through Neolith's Airless Pistol [NAP] technology granting the material a silky finish that proves especially interesting in the application of interior floorings for preventing stains and making it easier to clean.

Beton Silk

POLISHED

The Polished finish adds shine, depth; a reflection that stands out from its complete flatness and a touch of elegance. Ideal for the line of exclusive colours in the Classtone range while creating an amazing effect in styles such as Beton - it's noteworthy for its originality of mixing a concrete material with a typical finish of the more classical products. This is suitable for vertical surfaces only.

Beton Polished

RIVERWASHED

The new Riverwashed finish has evolved from its current predecessor providing greater relief, depth and surface roughness. It can be compared to a bush hammered or an aged finish and adds a touch of realism to Neolith's colour range, especially the range inspired by natural stone.

TECHNICAL FEATURES

SCRATCH RESISTANT

Resistant to scratching and abrasion due to the hardness of the surface.

EASY TO CLEAN

Resistant to chemical cleaning agents.

RESISTANT TO HIGH TEMPERATURES

Does not burn in contact with fire or let off smoke or toxic substances.

WATERPROOF

An absorption level near zero makes it resistant to stains.

SUITABLE FOR HEAVY TRAFFIC

Due to the hardness of the surface.

RESISTANT TO UV RAYS

Does not deteriorate from exposure to the sun or extreme temperatures.

100% RECYCLABLE

Up to 52% of any Neolith slab is comprised of recycled raw materials.

100% NATURAL

Resin-free. Does not release any harmful substances into the environment.

HYGIENIC

Completely suitable for contact with food. Does not release harmful substances.

LIGHT

The 3mm board is only 7kg/m² and the 12mm board is 30kg/m².

RESISTANT TO ICE AND FREEZING

Neolith is not damaged by low temperatures.

NEW STATE OF THE ART PRODUCTS COMBINING FUNCTIONALITY + BEAUTY

With a wide range of options, colour combinations and finishes you can create exceptional and unique spaces, with perfect finishes. Suitable for direct contact with food, waterproof and easy to clean. The size of our slabs makes Neolith the perfect solution for large surfaces, with fewer joints and excellent mechanical properties. Easy to transport, handle and install.
